

Gauge Pole Cover

Gauge Pole Covers are an innovative solution to emission reductions in Floating Roof Tanks. It is designed to inhibit hydrocarbons from escaping through slots in slotted holes from dip pipes.

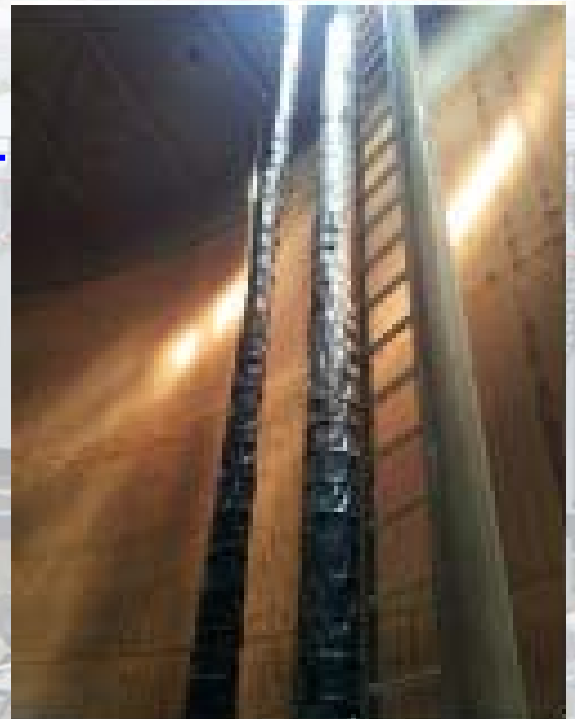

Features

- ◆ Reduces product emissions and save the vapor loss
- ◆ Meets the environmental regulations
- ◆ Can be installed while tank remains in service
- ◆ Freely use gauging and sampling equipment
- ◆ Chemical resistance and UV protection
- ◆ Folding cover design provides flexibility
- ◆ Hook/Zipper/Linking tape triple connection for easy installation
- ◆ Easily lowers for use of the ladder
- ◆ Custom design to ensure effective operation
- ◆ Provides efficient and economical solution

Features

- ◆ Gauge pole: 2", 3", 6", 8", 10" or upon request
- ◆ Ladder: design upon the ladder size and tank height
- ◆ Cover material: Polyurethane Coated or upon request
- ◆ Metal parts: Stainless steel or upon request
- ◆ Coil size: Ø3mm or upon request
